

Mining & Yellow Equipment

Mining is a tough, stressful environment where accident prevention is a top priority. With multiple systems active, full visibility and control over your operation is a necessity.

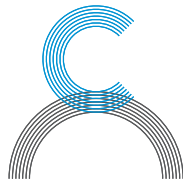

The Ctrack solution offers flexibility for mining and yellow equipment operations. Utilising a range of remote monitoring systems to alert control room staff to driver behaviour, safeguarding against accidents and ensuring maximum efficiency and productivity for your assets. Our solution offers asset-mounted sensors providing instant and detailed reports on events and situations.

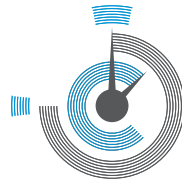

Ctrack Key Focus Areas

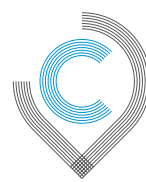

Safety & Security

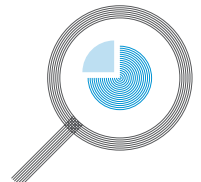

Driving Behaviour

Productivity & Efficiency

Control (Compliance)

Asset Management

Features

- Driver Identification & Driving Behaviour Monitoring**
- Engine Performance Monitoring (RPM & Idling)**
- Collision Avoidance Sensors**
- Fuel Level & Consumption Monitoring**
- Iris Camera Solution**
Front-Back-Side Facing Camera Option
- Onboard Weighing**
- Breathalyser**
- Tip Sensor**

Assets we can track: Dump Trucks • Front End Loader • Graders • Bulldozers • Dragline
• Water Bowsers • Light Duty Vehicle • Heavy Duty Vehicle
